

A14 westbound between junction 42, Westley Interchange and junction 40, Higham Interchange: carriageway surveys and resurfacing

I write to inform you that Kier and Graham Construction will be carrying out carriageway surveys and resurfacing works at the above location, on behalf of Highways England. Previous surveys have identified the need for maintenance works in this location, for road safety reasons. Additional surveys will also enable us to programme any necessary future maintenance works.

Due to weather conditions last week, these works had to be postponed from their original start date. We now plan to complete this work over **five nights**, from **Friday 16 August**, weeknights only, with working hours of **8pm to 6am**, weather permitting.

During this work a full closure of the A14 westbound carriageway will be in place between junction 43, St. Saviours Interchange and junction 38 Waterhall interchange, with associated slip road closures between these junctions.

Please note that details of this works are correct at the time of publishing and may be subject to change.

A map showing the road closure and diversion route can be found below.

Diversion route

A clearly signed diversion route will be in place directing A14 westbound traffic via the A134 northbound to Thetford, to join the A11 southbound before re-joining the A14 at junction 38, Waterhall interchange.

Diversion Map:

We apologise for the local inconvenience these works may cause and thank you for your patience whilst we carry out strategic maintenance to the road network. We would be grateful if you would share information locally about the works.
